TYPICAL 4-YEAR COLLEGE ADMISSION REQUIREMENTS*

Category	Units	Requirements
English	4	All units must include intensive reading & writing experiences
Mathematics	4	 Algebra Algebra II Geometry One additional unit that builds on knowledge & concepts Learned in Algebra II
Social Science	3	 1 unit drawn from American and/or world history 1 additional unit drawn from history American government and/or geography a 3rd unit drawn from any social science discipline
NATURAL SCIENCE	3	 At least 2 units selected from : biology chemistry physics earth/physical sciences 1 unit must include laboratory instruction Anatomy/physiology counts as a unit
Foreign Language	2	 Both units must be in the same language Students who are unable to take 2 years of foreign language In high school may still qualify for admission NOTE: Some University of Nebraska-Lincoln degree programs require the equivalent of 4 years of high school foreign language in the same language in order to graduate. View foreign language requirements by degree at: http://admissions.unl.edu/nebraska/foreign-language-req.aspx

UNL Admission Requirements

* Requirements listed are only an example of the typical requirements to gain admission into a 4-year University. Please contact the school you are considering or visit their website for the most up to date Requirements.

MIDDLE SCHOOL COURSE DESCRIPTIONS

JUNIOR HIGH BAND

Length/Offered: Year

6th, 7th, 8th Grades Level:

120500 INSTRMUSIC Junior high band meets every other day and is offered to all students who are proficient on a traditional concert band

instrument. Students who have not previously been in band but would like to join will be asked to take private lessons with the director.

Junior High band members are expected to participate in the summer band program. The Junior high band performs at Czech Days, three home concerts, Milford music contests, and has the option to play with the high school pep band throughout the year.

JUNIOR HIGH CHOIR

Length/Offered: Year

6th, 7th, 8th Grades Level:

Junior High Choir introduces a seventh grade student to choral singing and continues through the eighth grade. Students are given the opportunity to sing in unison, two part, three part and some four part music. JH Choir is a non-auditioned choir, meaning any one can sign up for the class, no strings attached. Choral music from all style periods is studied, including songs in foreign languages. There is a special emphasis on musical growth through music literacy as an individual and as an ensemble. Music Literacy is the ability to read and understand music first aurally, then visually. Development of high standards of musicianship is pursued through the performance of quality choral music. This is an optional course, so students are expected to try their best and work well with others.

6TH, 7TH, & 8TH GRADE PHYSICAL EDUCATION

Length/Offered: Semester

Level: 6th. 7th. 8th Grades

Physical Education: This course is designed to promote the fundamentals of skill development through the use of modified sport with the aim at developing skills needed for proper physical development. It allows students to achieve mature form in the basic skills of weight lifting, running, sport, and fitness with an emphasis on coordination, balance, gross and fine motor skills, cardiovascular and muscular strength and endurance. Students demonstrate the use of tactics like good sportsmanship, positive attitude, cooperation, teamwork, and effort within sport activities. They participate regularly in moderate to vigorous physical activities daily, placing a lifelong participation in physical fitness. Students will be assessed on personal fitness throughout the semester.

Health Education: This course is designed to develop the knowledge on Health Education. Health concepts will be taught throughout the course including the areas of nutrition, personal hygiene, fitness and exercise, drugs and alcohol, wellness, and lifestyle skills. These will be taught with weekly and semester assessments to test knowledge. Health education is focused to help aid in the development of the young adults in 7th and 8th grade. It will help prepare them for other courses in health education and further expand their knowledge on health information.

The intent of this program is to enable each student to enjoy physical activity through improved fitness levels and better understanding of each recreational and health activity.

listening purposes designed to help students expand, develop, and apply the skills introduced in the elementary grades.

MATH 6

Level:

Length/Offered: Year 6th Grade Level:

6th Grade

This course includes experiences that include practice in numeration, computation, estimation, problem solving, geometry/special concepts and measurement. It introduces algebraic and statistical concepts and provides opportunities for students to develop understanding of the structure of mathematics.

SOCIAL STUDIES 6

LANGUAGE ARTS 6 Length/Offered: Year

Length/Offered: Year PS: 0315_6 6th Grade 150011 SOC MG I Level: NDE: The study of curriculum and experiences from one or all of the following: history, geography, economics, citizenship, government, cultural studies, and current events. Use this code for the first course in Social Studies at the middle grades/junior high.

SCIENCE 6

Length/Offered: Year PS: 0313 6 6th Grade Level: NDE: 130801 SCI MG I The study of topics from the biological, physical, and earth sciences. Learning experiences involve students in observing, exploring, discovering and experimenting for purposes of achieving understanding of how scientists work and what they know about the universe.

READING 6

Length/Offered:	Year	PS:	0318_6
Level:	6 th Grade	NDE:	050800 READ MG I
This course include	es experiences designed to help students expand, develop, ar	nd apply r	eading skills introduced in the
elementary grades	. This includes reading both for information and enjoyment.		

ART 6

Length/Offered:	Semester
Level:	6 th Grade

The curriculum includes activities and experiences designed to develop skills in working with a variety of artistic techniques, processes, and media. The curriculum relates art to the individual student, culture, history, and to other curricular areas.

6TH GRADE

PS: 0317_6 NDE: 050802 LANG MG I

PS: 0311 6 NDE: 112800 MATH MG I

PS: 0302 6

NDE: 020800 ART MG I

This course includes experiences that engage students in using language for a variety of reading, writing, speaking, and

ADOLESCENT DEVELOPMENT 6

Length/Offered: Semester Level: 6th Grade

PS: 03_6

NDE: 260200 ADOLE DEV

A course which focuses on helping adolescents better understand the aspects (social, emotional, physical, intellectual) of their own developmental stage. Topics such as self-concept; building self-esteem, establishing and maintaining positive relationships and communications with peers and adults; and assuming responsibility and independence would be included. The Skills for Adolescence/Quest program is one example of this course. The Second Step Curriculum is used to guide the course. If the course is focused more specifically towards the disciplines of family and consumer sciences, health, or social science, it should be included in the other category for that discipline.

TECH 6			
Length/Offered:	Semester	PS:	0303_6
Level:	6 th Grade	NDE:	050800 INTRO MG I

A course which focuses on the Google Educational Suite of programs made available to WC students. The focus is on using these tools to become a better, more organized student. Time is also spent on learning the basic skills needed to write code.

7TH GRADE

ENGLISH 7

Length/Offered: Year

Level: 7th Grade

The objective of English 7 is three-fold: 1) to explore the English language through the study of grammar; 2) to develop skills in using the English language through oral and written communication; and 3) to broaden thinking through the study of literature. Grammar units will include the parts of speech, correct usage, and sentence structure. Writing units will begin with the basics of writing and may culminate in the writing of organized paragraphs, poetry, and other creative writing. Life-time skills such as spelling, vocabulary, dictionary usage, note taking, etc. will be taught. An appreciation of literature will be fostered through the reading of short stories, novels, and poetry. Book talk presentations of student-selected novels are an integral part of the classroom multicultural experience. Students will use technology as appropriate and practice the norms of appropriate and responsible behaviors.

MATH 7

Level:

Length/Offered: Year

PS: 110809 NDE: 112802 MATH MGIII

Math 7 introduces and reinforces the fundamentals to studying mathematics. From this base, we will explore concepts and develop problem-solving skills. Through knowledge and understanding, students develop mathematical reasoning to make deductions and solve problems.

At the end of the course, students should be able to:

7th Grade

• know and demonstrate understanding of the concepts from the four different sections of mathematics (number sense, algebra, geometry, and data).

• use appropriate mathematical concepts and skills to solve problems in both familiar and unfamiliar situations, including those in real-life contexts.

• select and apply general rules correctly to make deductions and solve problems, including those in real-life contexts.

GEOGRAPHY 7

Length/Offered: Year

Level: 7th Grade

World Geography concentrates on developing an understanding of our world and its people. The class will consist of an introduction of our world and how to study it; including map skills, use of a globe, an atlas and the computer. These skills and geographical knowledge will be applied to various areas of the world. In addition, various topics and their impact on the world today will be studied (hunger, overpopulation, the environment, etc.).

This course has two sections: Introduction to Civics and Introduction to Consumer Economics. Civics is the study of government systems with the primary focus on democracy at the national, state, and local levels. We will look different Executive, Legislative, and Judicial branch functions and duties as well as citizenship and some early United States history. In Consumer Economics we will look at our economic system through different aspects. Money, banking, careers, interests, and consumer knowledge will all be covered. -

SCIENCE 7

Length/Offered:YearPS:130410Level:7th GradeNDE:130802 SCI MG IIScience 7 is the second course in an integrated science curriculum. This course gives a foundation for high school sciencecourses. The class will include inquiry based and lecture based learning activities. The units covered include the cell

system; human body systems; reproduction and growth; ecosystems; populations, communities and ecosystems; distribution of natural resources; human impact on the environment; wave and electromagnetic radiation; and electricity and magnetism.

ART 7

Length/Offered: Semester

Level: 7th Grade

PS: 029930 NDE: 020801 ART MG II

Art 7 students will experience a variety of art mediums while discovering new techniques in producing fine arts. Seventh grade students will understand color theory using various painting mediums. Students will focus on the elements of art when creating their projects. They will produce a variety of two dimensional and three dimensional projects. Seventh grade students will have daily sketchbook assignments to further develop their creativity. This class is designed to inspire creativity in a hands-on format.

INDUSTRIAL ARTS 7

Length/Offered:	Semester	PS:	100700
Level:	7 th Grade	NDE:	100500 TECH ED
Prerequisite:		Career	CEFOUND
Industrial Arts 7 c	covers technology of the present and future as it applies t	o manufacturii	ng in society today. Areas being
covered include la	asers, robotics, CO_2 car, alternative energy, hydraulics and	l pneumatics, b	oridge building, and electronics.

A rocket and woodworking shelf are constructed as a class project.

habits as well as a firm foundation in the use of research materials.

LEADERSHIP 7Length/Offered:SemesterLevel:7th GradeNDE:059934ENG OTHER

A course which focuses on helping adolescents develop a better understanding of leadership. Students will specifically talk about various elements of self-leadership including topics about what leadership is, character, commitment, confidence and self talk, dealing with failure, and decision making. Discussions will be aimed at helping students translate their knowledge of self-leadership to improve their own lives, improve their relationships with their peers, and have a positive impact on their family, their school, and their community.

8TH GRADE

MATH 8

Length/Offered: Year 8th Grade Level:

Math 7 Prerequisite:

This course is a continuation of 7th grade math and an introduction to Algebra. It is a bridge from concrete to the abstract study of mathematics. Topics included are number sense (exponents, integers, expressions), algebra relationship (representing mathematical situations with multi step equations, graphing, inequalities), geometry (exploring the relationships of geometric properties), and data (expand on understanding of statistics). Real world applications are also presented within the course content.

ALGEBRA I

Length/Offered:	Year	PS:	110300
Level:	8 th Grade	NDE:	110300 ALGEBRA BE
Prerequisite:	Math 7		

This course is the foundation for high school mathematics courses. It is the bridge from the concrete to the abstract study of mathematics. Topics include simplifying expressions and exponents, evaluating and solving equations and inequalities, graphing and writing linear equations, and probability and data analysis. Real world applications are presented within the course content.

ENGLISH 8

Length/Offered: Year PS: 050011 8th Grade Level: NDE: 050803 LANG MG II The objective of English 8 is to provide a continuation of the reading, writing, speaking and listening skills introduced in English 7. A unit on grammar will be covered and then incorporated into the rest of the year. Students will improve their writing skills focusing on the Six Traits of Writing through a variety of small and big writing assignments. Short stories,

poetry, novels, nonfiction and fiction will be covered in separate units. Students will work on communication skills by having small presentations throughout the year. Students will use technology as appropriate and practice the norms of appropriate and responsible behaviors.

AMERICAN HISTORY 8

Length/Offered: Year 8th Grade Level:

This course is an introductory level course to early American History. We start with ancient native civilizations and cover up to the Civil war. We spend one full unit talking about early American Government as well. Fourth quarter is a Nebraska History unit with a small dose of Wilber/Saline History thrown in. Students take various field trips around town and are sent out to find some local Nebraska history with their parents. fB

SCIENCE 8

Length/Offered: Year 8th Grade Level:

Science 8 is a class is the third course in an integrated science curriculum. This course gives a foundation for high school science courses. The class will include laboratory and group activities. The units covered include elements and the

periodic table; chemical reactions; forces and motion; genes and heredity; natural selection; history of the Earth; energy in the atmosphere and ocean; climate; and solar system .

READING/STUDY SKILLS/RESEARCH SKILLS 8

Length/Offered: Semester

Level: 8th Grade

The objective of this course is to reinforce and expand upon ELA skills essential for student success in high school and beyond. Through direct, explicit comprehension instruction, students will learn and apply the SQ3R (Survey, Question, Read, Recite, Review) process as well as Close Reading techniques, while reading classic literature. Study skills such as time management, memorization techniques, test-taking strategies, and best practices for self-directed learning will be covered. Note taking and organizational skills using both traditional and electronic methods will be stressed. Email etiquette, online learning tools, and online safety practices will be highlighted.

FOREIGN LANGUAGE 8

Length/Offered: Semester

Level: 8th Grade

This is an introductory course giving eighth grade students an insight into the Spanish language and hispanic cultures. This class will be dedicated to understanding the basics of communication and its importance. Students will spend time reading, writing, listening to, and speaking Spanish. Authentic materials such as videos, articles, and online resources will be used in class. By the end of this course students will be familiar with a variety of hispanic cultures and the Spanish language and use this knowledge to appreciate other cultures.

CHARACTER EDUCATION **				
Length/Offered:	Semester	PS:	90506	
Level:	8 th Grade	NDE:	260200 ADOLE DEV	

Prerequisite:

Character Education follows the Six Pillars of Character taken from Character Counts, as well as other various character traits. The traits include trustworthiness, respect, responsibility, fairness, caring, citizenship, honesty, courage, diligence and integrity. Class discussions, role playing, speeches and group projects will be used incorporating one or more of the traits. Character Education is a class focused on allowing students to evaluate their values, choices and reflect on the type of person they are becoming.

COMPUTER APPLICATIONS 8 **				
Length/Offered:	Semester	PS:	270502	
Level:	8 th Grade	NDE:	033422 COMP APP	
Prerequisite:		Career	CEFOUND	
This middle-level	course is designed to emphasize digital citizenship	basic computer oper	ations word processing	

This middle-level course is designed to emphasize digital citizenship, basic computer operations, word processing applications, spreadsheet applications, presentation applications, and technology communication tools. Students will master keyboarding skills; compose, create, edit, and format word processing documents; organize and manipulate data in a spreadsheet; and prepare a formal presentation.

INTRODUCTION TO AGRICULTURAL CAREERS **

Length/Offered:	Semester	PS:	018001
Level:	8 th Grade	NDE:	018002 AG CAR LIT
Prerequisite:		Career	CEFOUND

Introduction to Agricultural Careers is an exploratory course for 8th grade students. Students explore a variety of careers in agriculture and gain knowledge and skills about animal science and plant science. Students complete several projects

to learn about agriculture concepts. Classroom and Lab activities are supplemented through SAE and leadership programs and activities.

** Each 8th grade student will take all three trimester classes. Each class will be taken consecutively for a 3rd of the school year, and will show separately on all report cards and mid-terms.

SPEECH 8

Length/Offered: Semester

Level: 8th Grade

Speech 8 is an introductory course designed to give 8th grade students foundational skills in effective oral communication. Students will participate in interactive activities, presentations, and practice exercises in order to develop essential public speaking skills, boost their self-confidence, and learn how to express themselves clearly and articulately. The goal for students is to become empowered, confident communicators in various personal, academic, and real world situations.

HIGH SCHOOL COURSE DESCRIPTIONS

AGRICULTURE

INTRODUCTION TO AG, FOOD AND NATURAL RESOURCES

Length/OffereD: Year

Level: 9th Grade

Prerequisite:

Introduction to Ag, Food and Natural Resources is the introductory course from the Agriculture, Food and Natural Resources Career Cluster providing a knowledge base and technical skills in all aspects of the industry. Learners will be exposed to a broad range of agriculture, food and natural resources careers, cluster foundation knowledge and skills, introduction to leadership development, the FFA organization and career exploration. Classroom and laboratory activities are supplemented through Supervised Agricultural Experiences (SAE) and leadership programs and activities. ** Students may be required to compete at a District Career Development Event*

ANIMAL SCIENCE

Length/Offered:	Semester (Fall Semester of Even Calendar Year)	PS:	011004
Level:	10 th , 11 th , 12 th Grades	NDE:	011004 ANI BIO
Prerequisite:	Introduction to Ag, Food and Natural Resources	Career:	CEAGFNRS

Animal Science is a course focusing on the basic scientific principles and processes that are involved in animal physiology, breeding, nutrition and care in preparation for an animal systems career. Topics include animal disease, introduction to animal science, animal nutrition, animal science issues, career opportunities and animal evaluation. Classroom and laboratory activities are supplemented through Supervised Agricultural Experiences (SAE) and leadership programs and activities.

* Students may be required to compete at a District Livestock Evaluation Contest.

Companion Animals provides instruction on animal husbandry topics related to companion animals that are served by a veterinarian. This course includes breeding, grooming, care and marketing of companion animals. Classroom and laboratory activities are supplemented through FFA Contests/ Career Development Events, Supervised Agricultural Experiences (SAE), and leadership programs and activities.

* Students may be required to compete at a District Vet Science Contest.

AGRIBUSINESS

Length/Offered:	Semester (Every Fall Semester)	PS:	011009
Level:	11 th , 12 th Grade	NDE:	011009 AGRI BUSN
Prerequisite:	Introduction to Ag, Food and Natural Resources	Career:	CEAGFNRS

Agribusiness covers skills necessary for entry into employment or furthering education in an agriculture business. The course includes the study of business organizations, business structures, job applications and interviewing, human relations, marketing, selling, displaying, using business machines, management and entrepreneurship skills. Classroom and laboratory activities are supplemented through Supervised Agricultural Experiences (SAE) and leadership programs and activities.

PS:	011001
NDE:	011000 AG/EN-INTR
Career:	CEAGFNRS

AGRICULTURAL SALES

Length/Offered: Semester (Every Spring Semester)

Level: 11th, 12th Grade

Prerequisite: Introduction to Ag, Food and Natural Resources

Agricultural Sales covers the fundamentals and techniques of successful selling, developing sales personality and the selling cycle. Classroom and laboratory activities are supplemented through Supervised Agricultural Experiences (SAE) and leadership programs and activities.

HORTICULTURE

Length/Offered:	Semester (Fall Semester of Even Calendar Year)	PS:	012000
Level:	11 th , 12 th Grades	NDE:	011007 HORT
Prerequisite:	Introduction to Ag, Food and Natural Resources	Career:	

This class is designed to assist students to see the world around them from a horticulture standpoint. Horticulture is a diverse and exciting field of study with many career opportunities. Students will explore the Horticulture, Nursery Landscape, and Greenhouse Management industries as a science and how it affects the environment around us They will also identify the importance and the science of propagation. The students will be subject to studies of nutrients, fertilizers, and plant growth regulators within lab practices in the greenhouse. Finally, students will explore management techniques with pest control, by utilizing our greenhouse resources. Students may b

* Students may be required to compete at a District Contest relevant to the course work covered in class.

PLANT SCIENCE

Length/Offered:	Semester (Fall Semester of Odd Calendar Year)	PS:	011008
Level:	10 th , 11 th , 12 th Grades	NDE:	011007 PLANT SCI
Prerequisite:	Introduction to Ag, Food and Natural Resources	Career:	CEAGFNRS

This class is designed to give students a broad overview of the types of plants, importance of plants, their uses, and the importance of specific agronomic crops and cash crops to the populations around the world. Students will gain a better understanding of plants, and the production of plants through various exercises including, tests, quizzes, guest speakers, contests, and laboratory experiments. This class is designed to allow students to harness creativity through research and questioning so they may demonstrate the global importance of plants to all civilizations.

* Students may be required to compete at a District Soil Evaluation Contest.

SPEECH DEVELOPMENT AND DELIVERY

Length/Offered:	Semester (Every Fall Semester)	PS:	016910
Level:	10 th , 11 th , 12 th Grades	NDE:	019930 AGRI OTHER
Prerequisite:		Career:	

Speech Development and Delivery provides instruction for students to engage in the process of developing different types of speeches such as informative, demonstrative, entertainment, extemporaneous and persuasive. Students will write and deliver each of the different types of speeches after choosing a topic. *Classroom projects are supplemented through District FFA Leadership Skills Event.*

LEADERSHIP AND HUMAN RELATIONS

Length/Offered:	Semester (Every Spring Semester)	PS:	017000
Level:	10 th , 11 th , 12 th Grades	NDE:	017000 LEADER
Prerequisite:		Career:	CEAGFNRS

Leadership and Human Relations includes instruction in leadership in a community, leadership concepts/applications, characteristics of an effective leader, characteristics of an effective manager and related practicum. Classroom and laboratory activities are supplemented through Supervised Agricultural Experiences (SAE) and leadership programs and activities.

NDE: 011011 AG SA/ENTP Career: CEAGFNRS

PS: 011011

FOOD SCIENCE

Length/Offered: Year Level:

11th, 12th Grades

Prerequisite: Introduction to Ag, Food and Natural Resources

Food Science is designed to give the student an overview of the food science industry and provide the skills to succeed in this industry. Students will encounter units on nutrition, the chemistry of food, food additives, sanitation, and processing/ food preservation. This course will also take a closer look at the various careers available and cover many organizations that have a direct impact on the food science industry. The student will apply their knowledge learned in the classroom with various activities in the laboratory. Evaluations will include, but are not limited to, written tests along with application in the laboratory. Some hands on activities may include processing jerky and dehydration of other foods. Students may also apply their skills to the use of heat and cold for processing, packaging, labeling and preserving foods.

LIVE ANIMAL SELECTION/ CARCASS EVALUATION

Length/Offered: Semester (Every Fall Semester)

11th. 12th Grades Level:

Introduction to Ag, Food and Natural Resources Prerequisite:

This course is designed to provide students an opportunity to become familiar with the Livestock and Meat Industries. Students will practice methods of selection and evaluation of live animals and carcasses, train in selection of breeding animals of economic importance, explore breeds, sex, and age classifications of livestock. Discover live animal caned carcass patterns, survey the live animal and carcass characteristics as well as explain the relative values of retail and wholesale cuts. * Students may be required to attend and compete at a District Livestock Evaluation Contest.

MEAT SCIENCE

Length/Offered:	Semester (Every Spring Semester)	PS:	014001
Level:	11 th , 12 th Grades	NDE:	018081 FOOD SCI
Prerequisite:	Introduction to Ag, Food and Natural Resources	Career:	

This class is designed for career and technical education students who require all phases and types of competencies in the different meat industries. This course will follow the general introduction to the meat Industry, its history, the careers available, and the importance of safety and environmental concern. Points of interest intended to encourage the student to explore the production of meat from cattle, pigs, sheep, goats, poultry and various game animals. Students will interact with classmates and animals while testing their knowledge and skills in the classroom and laboratory, by identifying various cuts, grading those cuts, and demonstrate an understanding of chemical factors within those cuts of meat. The students will be required to investigate and report on several topics of each species of livestock as we travel together through the wonderful and exciting world of Meat Science. Classroom and laboratory activities are supplemented through FFA Contests/ Career Development Events, Supervised Agricultural Experiences (SAE) and leadership programs and activities. * Students may be required to attend and compete at a District Meats Evaluation Contest.

ART I			
Length/Offered:	Year	PS:	020100
Level:	9 th , 10 th , 11 th , 12 th Grades	NDE:	020100
Art Fee:	\$15.00		
Projects:	Varies depending on interest of class		
Art 1 is a course t	hat provides a framework for future art classes. The basic l	ouilding block	ks are discove

Art 1 is a course that provides a framework for future art classes. The basic building blocks are discovered and demonstrated through a variety of mediums. The language of visual arts is broken down into specific art projects. Vocabulary and design principles are emphasized as part of the art framework. Students will be introduced to a variety of paints and painting techniques which include watercolor, tempera, and acrylic paint. The student's personality and mood may be reflected in each artwork. Students will understand the basic drawing skills, color theory, work with pen & ink techniques. They will also study art history.

ADVANCED DRA	WING		
Length/Offered:	Semester	PS:	020200
Level:	10 th , 11 th , 12 th Grades	NDE:	020200 ART II
Prerequisite:	Art 1		
Art Fee:	\$15.00		
Projects:	Varies depending on interest of class		
This class is design	ned to enhance students' thinking and creativity beyon	d the basic draw	ing techniques that v
introduced in Art?	1. Students will focus on creating work using observativ	anal drawing life	drawing grid draw

This class is designed to enhance students' thinking and creativity beyond the basic drawing techniques that were introduced in Art 1. Students will focus on creating work using observational drawing, life drawing, grid drawing. Throughout the semester students will strengthen their observational skills, proportions, detail work, and pushing values through a variety of drawing projects.

ADVANCED PAINTING

Length/Offered:	Semester	PS:	020300
Level:	11 th , 12 th Grades	NDE:	020300 ART III
Prerequisite: Art Fee: Projects:	Art I \$15.00 Varies depending on interest of class		

This class is designed to enhance students' thinking and creativity beyond the basic painting techniques that were introduced in Art 1. Students will explore different painting movements from history and will create paintings inspired by these movements. Throughout the Semester students will explore a variety of ways in which artists paint; for example using alternative brushes, primed canvas/paper, and hard line painting.

ART IV

Length/Offered:	Semester	PS:	020400
Level:	11 th , 12 th Grades	NDE:	020400 ART IV
	Art 1, Advanced Drawing, Advanced painting, Ceramics,		
Prerequisite:	and Creative Techniques		
Art Fee:	To be determined by projects		

Independent study allows the opportunity to explore individual interest in the art realm. This course involves motivation, dedication, and passion for creating/expressing art. All work will be developed in a series; artwork will be analyzed and developed throughout the Semester. On their own the student will show their personality, individuality, and self-expression through their work. Students will be expected to write a one page artist statement explaining their creative process, their inspirations, and the purpose for their art.

PHOTOGRAPHY

Length/Offered: Semester Level: 9th, 10th, 11th, 12th Grades

Photography is a semester long course that will introduce the student to photography using digital cameras. The student will learn to control exposure through manipulating the components of the exposure triangle. Post production editing will be taught using readily available freeware.

MEDIA PRODUCTION

Length/Offered:SemesterPS:270609Level:9th, 10th, 11th, 12th GradesNDE:270609 PHOTOGRAPHMedia Production focuses on creating digital video in a variety of formats. The students will learn how to write, film, and
edit different types of productions such as how to videos or PSA's with an eye toward both web and hard copy
distribution of the final product.

CERAMICS

Length/Offered:	Semester	PS:	029931	
Level:	10 th , 11 th , 12 th Grades	NDE:	029931 VIS ART OR	
Prerequisite: Art 1				

Art Fee: \$20.00

Ceramics is a Semester long course where students will solely focus on creating with clay. Throughout the Semester the students will explore multiple handbuilding techniques and throwing on the wheel. We will mainly focus on creating functional art pieces.

CREATIVE TECHNIQUES				
Length/Offered:	Semester	PS:	029933	
Level:	10 th , 11 th , 12 th Grades	NDE:	029933 VIS ART OR	
Prerequisite: Art 1				

Art Fee: \$15.00

Creative Techniques is a Semester long class where students get to explore a variety of ways to create art. In this class students will experience batik, sculpture, altered books, and fiber arts. In this class we will move beyond the basic drawing and painting to push students to think outside the box.

brochures, reports, advertising materials and other publications, including the high school yearbook. Students will demonstrate document composition and communication competencies.

DIGITAL DESIGN (DIGITAL MEDIA 2)

Length/Offered: Year Level: 11th & 12th Grades

Prerequisite:

Students will develop skill in the electronic procedures of producing and editing publications. Students will create, format, illustrate, design, layout, edit/revise and print publications including electronically produced newsletters, flyers, brochures, reports, advertising materials and other publications, including the high school yearbook. Students will demonstrate document composition and communication competencies.

MARKETING MANAGEMENT

Length/Offered: Semester Level: 10th, 11th, 12th Grades

Marketing Management class covers topics of the management of college, professional and amateur sports including careers associated with those venues. The course uses concepts, case studies, online simulations, and videos to study management functions, decision making, business strategies, financing, day to day operations, budgets, and legal issues surrounding the sports and entertainment venues.

ENTREPRENEURSHIP

Length/Offered: Semester

Level: 10th, 11th, 12th Grades

Entrepreneurship is a course designed to teach basic concepts and principles of the risks and rewards of owning a business. Students will learn business concepts to plan, organize, finance and manage a business in today's society. Marketing and finance skills will be covered in-depth about the business ownership. Computer skills will be necessary for this class as students will complete business plans using word processing, spreadsheets, power points, and desktop publishing skills.

ENGLISH

ENGLISH 9

Length/Offered: Year Level: 9th Grade

PS: 050021 NDE: 050021 ENG I

- GRADUATION REQUIREMENT -

The objective of English 9 is to develop skills in using the English language and to broaden thinking skills through the study of literature and critical writing. Grammar units may include: parts of speech, parts of a sentence, proper usage, etc. Life-time skills such as spelling, vocabulary, note taking, study skills, etc. will be taught. Literary units may include the study of: *Romeo and Juliet, West Side Story*, novels, short stories, poetry, etc. Student writing will focus on reaction writings and the five paragraph expository theme. Book talk presentations of student-selected novels are an integral part of the classroom multicultural experience. Students will use technology as appropriate and practice the norms of appropriate and responsible behaviors.

ENGLISH 10 Length/Offered: Year Level: 10th Grade

PS: 050022 NDE: 050022 ENG II

PS:

NDE:

059931

050301 AM LIT

- GRADUATION REQUIREMENT -

The objectives of English 10 are to increase reading, writing, speaking and listening experiences as students enter young adulthood. English 10 consists of units including the literary genres of: short story, novel, script, multicultural (as chosen by student for book talk), poetry and essay (both expository and memoir). Writing units will mirror the reading as students will write extensively in at least two of these genres including reflective journals, poetry and/or essay. Vocabulary development will be stressed as well as Standard English (including parts of speech), the Six Traits of Writing, life-skills of organization and time management, and reading comprehension strategies. Speaking, listening and presentation will be accomplished through oral presentations of student developed pieces, book talks, group discussions and cooperative projects. Students will use technology as appropriate and practice the norms of appropriate and responsible behaviors.

ENGLISH 11 Length/Offered: Year Level: 11th Grade

- GRADUATION REQUIREMENT -

The objective of English 11 is to acquaint students with American literature. This survey course examines both classic and contemporary major American writers and literary movements. In addition to the study of short stories and poetry, seminal novels such as *Adventures of Huckleberry Finn, To Kill a Mockingbird, Of Mice and Men,* etc. may be studied. Student writing will focus on reaction writings, criticisms, and the persuasive five paragraph theme. Life-time skills such as spelling, vocabulary, note taking, study skills, etc. will be taught. Book talk presentations of student-selected novels are an integral part of the classroom multicultural experience. This course is recommended for those students planning on attending a community college, technical or trade school, or entering the work force after high school. Students will use technology as appropriate, and practice the norms of appropriate and responsible behaviors.

ENGLISH 11 CP Length/Offered: Year

Level: 11th Grade

PS: 050023 NDE: 050023 ENG III

- GRADUATION REQUIREMENT -

The objective of English 11 College Prep is to acquaint students with classic American literature. This course takes a chronological approach to the study of the major American writers and literary movements. In addition to the study of short stories and poetry, seminal novels such as *Adventures of Huckleberry Finn, The Great Gatsby, Of Mice and Men,* etc. may be studied. Student writing will focus on reaction writings, criticisms, and the persuasive five paragraph theme. Life-time skills such as spelling, vocabulary, note taking, study skills, etc. will be taught. Book talk presentations of student-selected novels are an integral part of the classroom multicultural experience. This course is recommended for those students planning on attending a four year college after high school. Students will use technology as appropriate and practice the norms of appropriate and responsible behaviors.

ENGLISH 12

Length/Offered:	Year
Level:	12 th Grade

PS: 050024 NDE: 050506 APPLD COMM

- GRADUATION REQUIREMENT -

The objective of English 12 is to provide students with school-to-work English skills and knowledge of the use of the language arts in society, especially the workplace. Students will review reading, writing, listening and communication skills including research on a career. Writing will include technical and/or business documents such as letters of application, resumes, memos, etc. Modern literature, theatre and drama, historical literature, multicultural and nuevo journalism will be the reading focus and accomplished through media, presentation, book talks and other means. Public speaking, organizational skills, theatre, and vocabulary will help prepare the student for life-long language arts appreciation (both in personal and professional life) and enable the possibility of successfully completing a two-year college program. Students will use technology as appropriate and practice the norms of appropriate and responsible behaviors.

ENGLISH 12 CP

Length/Offered:	Year		PS:	050100
Level:	12 th Grade	Ν	IDE:	050024 ENG IV

- GRADUATION REQUIREMENT -

The objective of English 12 College Prep is to acquaint students with British and contemporary literature, and to provide them with writing and research skills required in college. Students will learn fundamental research skills and college writing skills for a formal research paper complete with MLA citation and works cited list. Students will learn through a historical continuum of literary works including *Beowulf*, Chaucer, Shakespeare, Victorian literature and contemporary English writers. Through individual reading, oral presentation and projects, students will learn analysis, evaluation and synthesis of literature. Keeping a notebook, taking notes and test taking strategies will provide study skills needed for higher education. Theatre and public speaking will provide the student with the liberal arts program necessary for college entrance and book talks will provide experiences in multicultural literature. The course is recommended for college bound students. Students will use technology as appropriate and practice the norms of appropriate and responsible behaviors.

ADOLESCENT LITERATURE

Length/Offered: Semester

Level: 9th, 10th, 11th, 12th Grades

This class is a survey of the various genres of adolescent literature. Emphasis is on evaluation of quality, thematic study and the inter/cross disciplinary uses of young adult literature. Projects will include student presentations, current best sellers, media/literature connections and reflective writing. Students will use technology as appropriate and practice the norms of appropriate and responsible behaviors.

COMPOSITION I

Length/Offered: Semester

Level: 9th, 10th, 11th, 12th Grades

Composition I strives to teach students writing skills in a variety of structures and styles. The main focuses of the class are proper composition techniques like formatting, editing, and composing, and the use of correct conventions within said areas. Students will be asked to develop skills in brainstorming, sentencing, paragraphing, organizing, and revising for a specific audience or purpose. Scholars will build on these skills through a multi-step process for each composition. Within a semester, they will be able to create both fiction and nonfiction works and experiment with different writing styles. Students will also learn peer-to-peer editing as a way to develop and revise. Composition is recommended for any student planning to attend postsecondary education or looking to better their writing techniques for English and other subject areas.

SPEECH

Length/Offered: Year

Level:

9th, 10th, 11th, 12th Grades

The objective of Speech will be on lifetime skills in speaking. This course is both an activities and theory-oriented approach to the study of speech communication focusing on NSAA competitive speech events as well as real world opportunities requiring public speaking skills. Major fields of study may include: the communication process, verbal and nonverbal communication, informative speaking, persuasive speaking, demonstrations and interpretations of prose, poetry and drama. This course is recommended for any student planning to attend any postsecondary education.

WORLD MYTHOLOGY

Length/Offered: Semester

Level: 9th, 10th, 11th, 12th Grades

This class is a survey of mythology from around the world with emphasis on Greco/Roman mythology, Native American mythology, Norse mythology and Egyptian mythology. Includes thematic study and the inter/cross disciplinary uses of mythology. Projects will include student presentations, mythology in today's world, media and reflective writing. Includes some scholarly archeological reading. Students will use technology as appropriate and practice the norms of appropriate and responsible behaviors.

FOREIGN LANGUAGE

SPANISH I Length/Offered: Year Level: 9th, 10th, 11th, 12th Grades Prerequisite:

PS: 060241 NDE: 060241 SPANISH I

¡Bienvenidos a la clase de español! This is an introductory course to the study of Spanish and Spanish-speaking countries and cultures. Students will be able to communicate at the basic level of Spanish and become familiar with elements of various Spanish-speaking cultures. The emphasis of this course is placed on the development of the four main modes of language: listening, speaking, reading, and writing. The context is intended to focus on students' lives and experiences and gives them exposure to various Spanish-speaking countries, customs, and lifestyles. Although the main focus is on basic, meaningful communication, grammar is integrated throughout the course. Students will also acquire insight as to how languages and cultures work together by comparing Spanish to their own culture(s). By the end of this course, students will be able to effectively communicate basic sentence structures using the present tense, and express a multitude of things about themselves, objects, and others.

SPANISH II			
Length/Offered:	Year	PS:	060242
Level:	10 th , 11 th , 12 th Grades	NDE:	060242 SPANISH II
Prerequisite:	Spanish I		

¡Bienvenidos a la clase de español! This is a low-intermediate course of the study of Spanish and Spanish-speaking countries and cultures. It allows students to communicate fluently in Spanish and to become familiar with more elements of Spanish-speaking countries and cultures. The emphasis of this course is placed on the development of the four main modes of language: listening, speaking, reading, and writing. The context is intended to focus on students' lives and experiences and give them exposure to various Spanish-speaking countries, customs, and lifestyles. Although the main focus is on basic, meaningful communication; grammar is integrated throughout the course. Students will also acquire insight as to how languages and cultures work together through comparing Spanish to their own cultures(s). By the end of this course, students will be able to effectively and comfortably communicate low-intermediate sentence structures using present, preterite, and imperfect tenses to express a variety of contents.

SPANISH III			
Length/Offered:	Year	PS:	060243
Level:	11 th , 12 th Grades	NDE:	060243 SPANISH III
Prerequisite:	Spanish II		

¡Bienvenidos a la clase de español! This is a high-intermediate course of the study of Spanish and Spanish-speaking cultures. It allows students to communicate fluently in Spanish and to become familiar with more elements of Spanish-speaking cultures. The emphasis of this course is placed on the development of the four main modes of language: listening, speaking, reading and writing. The context is intended to focus on students' lives and experiences, and gives them exposure to various Spanish-speaking countries, customs, and lifestyles. Although the main focus is on basic, meaningful communication; grammar is integrated throughout the course. Students will also acquire insight as to how languages and cultures work together through comparing Spanish to their own culture(s). By the end of this course, students will be able to effectively and comfortably communicate high-intermediate sentence structures using a variety of tenses, and fluidly express content in more than one way.

This class may be taken for Dual Credit through Nebraska Wesleyan. For more information see the Dual Enrollment section at the back of the book. Additional projects and academic requirements apply.

SPANISH IVLength/Offered:YearLevel:11th, 12th GradesPrerequisite:Spanish III

PS:	060244
NDE:	060244 SPANISH IV

This is an advanced study of Spanish and Spanish-speaking cultures. Students will be able to advance to this level with instructor and/or administrators approval, along with having passed Spanish III with an A or a B. This course will help students to communicate fluently in Spanish and to become familiar with more elements of Spanish-speaking cultures. The emphasis of this course is placed on the development of the four main modes of language: listening, speaking, reading, and writing. Through novel study, projects, listening to music and film studies, students will acquire more advanced vocabulary and communication skills in Spanish. The context is intended to focus on students' lives and experiences and gives them exposure to various Spanish-speaking countries' customs and lifestyles. Although the main focus is on basic, meaningful communication, grammar is integrated throughout the course. Students will also acquire insight as to how languages and culture work together through comparing Spanish to their own cultures(s). By the end of this course, students will be able to effectively and comfortably communicate advanced sentence structures using a variety of tenses and fluidly express content in more than one way.

This class may be taken for Dual Credit through Nebraska Wesleyan. For more information see the Dual Enrollment section at the back of the book. Additional projects and academic requirements apply.

Prerequisite:

Provides experiences in instruction in metals, welding and related careers course includes metal equipment identification/maintenance/safe usage, oxyacetylene, oxyacetylene welding/cutting, arc welding, arc welding/cutting, mig/tig/plasma arc welding/cutting and related practicum.

Career: CEMANUFA

NOTE:

All Industrial Art students, with the exception of Industrial Arts 7, are to buy their own safety glasses and provide their own lock for their locker. Students will pay a fee at the end of the year to cover the cost of any tools that are missing.

MATHEMATICS

ALGEBRA I

Length/Offered: Year Level: 9th Grade

Level.

Prerequisite:

This course is the **second half** of the foundation for high school mathematics courses. It is the bridge from the concrete to the abstract study of mathematics. Topics include graphing and writing linear equations, simplifying polynomials and rational and radical expressions and equations, and solving systems of equations. Real world applications are presented within the course content.

GEOMETRY

Length/Offered:	Year	 111200
Level:	9 th , 10 th , 11 th , 12 th Grades	111200 GEOMETRY
Prerequisite:	Algebra I or Algebra IA and IB	

This course is an integration of modern and traditional Geometry. The topics covered include: reasoning, logic, traditional proofs, triangle relationships, linear relationships, similarity, polygons and prisms. A strong foundation in Algebra is needed to be able to solve many of the problems evaluated in this course. Most two year post high school programs recommend this course. All four year post high school programs require this course for admission.

APPLIED MATH			
Length/Offered:	Year	PS:	110501
Level:	10 th , 11 th , 12 th Grades	NDE:	110501 APPLDMATHI
Prerequisite:	Algebra I or Algebra IB		

This course covers topics from the core standards that are covered on the Nebraska State Accountability Test and personal and business related mathematics. Topics include, basic measurement, estimation, computation, formula use, statistics, problem solving, and finances. Applied Math is designed for students who are preparing for a two year post high school course. It is not recommended for students that have already completed Algebra 2 or who are interested in a four year college program.

ALGEBRA II

Length/Offered:	Year	PS:	110306
Level:	9 th , 10 th , 11 th , 12 th Grades	NDE:	110306 ALGEBRA AD
Prerequisite:	Algebra I or Algebra IB		

Algebra II builds upon topics from Algebra I. More advanced algebraic concepts are explored including inequalities and the following types of functions: quadratic, polynomial, rational, radical, and logarithmic. Throughout the course, students will also learn how to apply these topics to real life situations. Most four year post high school programs require this course for admission.

PRE-CALCULUS			
Length/Offered:	Year	PS:	112910
Level:	11 th , 12 th Grades	NDE:	111300 PRE CALC
Prerequisite:	Algebra II		

Pre-Calculus is an application of upper level Algebra II concepts. Topics that will be covered include analytical geometry, trigonometry, and the following types of functions: polynomial, rational, exponential, quadratic and logarithmic. This class is for students preparing for a four-year college or a career that involves upper level mathematics.

CALCULUS			
Length/Offered:	Year	PS:	110600
Level:	12 th Grade	NDE:	110600 CALCULUS
Prerequisite:	Pre-Calculus		
Calculus is the ma	thematics of objects in motion or underg	oing change. This class uses a	n applied approach along v

Calculus is the mathematics of objects in motion or undergoing change. This class uses an applied approach along with the foundation built in Algebra I, Geometry, Algebra II and Pre-Calculus to develop a mathematical understanding of derivatives, integrals, and limits. This class also explores how these topics relate to different areas of economics and real life situations. This class is recommended for students preparing for a career that involves upper level mathematics.

TRIGONOMETRY

Length/Offered:	Semester	PS:	110910
Level:	11 th , 12 th Grades	NDE:	111600 TRIG
Prerequisite:	Algebra II		

This course is a higher mathematics elective. Trigonometry uses the techniques that students have previously learned from the study of algebra and geometry. The trigonometric functions studied are defined both geometrically and algebraically. Students should have a clear understanding that the definition of the trigonometric functions is made possible by the notion of similarity between triangles. Graphing utilities are used to enhance learning and scientific calculators are used in finding the value of trigonometric functions and their inverses.

PROBABILITY AN	ID STATISTICS		
Length/Offered:	Semester	PS:	111700
Level:	12 th Grade	NDE:	111700 STATISTICS
Prerequisite:	Algebra II, Geometry		

This course offers probability and statistical content to students preparing for four-year or technical college experiences. The course includes the following: frequency distributions and graphs, data description, probability and counting rules, discrete probability distributions, the normal distribution, confidence intervals and sample size, correlation and regression, and hypothesis testing.

<u>MUSIC</u>

BAND	
Length/Offered:	Year
Level:	9 th , 10 th , 11 th , 12 th Grades

PS: 120500 NDE: 120500 INSTRMUSIC

High School band meets daily and is offered to all students who are proficient on a traditional concert band instrument. Students who have not previously been in band but would like to join will be asked to take private lessons with the director.

Students will perform a wide array of musical styles relevant to the wind band ensemble and focus on skills that will best improve their proficiency on the assigned instrument. In addition to the home concert band concerts, the high school band will also be expected to perform at district music contest, all home football games, potential state and district football playoff games, a minimum of five basketball games or double headers, and potential district or state basketball playoff games.

CONCERT CHOIR

.

Length/Offered:	Year	PS:	120400
Level:	9 th , 10 th , 11 th , 12 th Grades	NDE:	120400 VOCALMUSIC

Concert Choir is a non-auditioned choir, meaning any one can sign up for the class, no strings attached. Choral music from all style periods is studied, including songs in foreign languages. There is a special emphasis on musical growth through music literacy as an individual and as an ensemble. Music Literacy is the ability to read and understand music first aurally, then visually. Development of high standards of musicianship is pursued through the performance of quality choral music. This is an optional course, so students are expected to try their best and work well with others. This group performs extensively through the school year. The following performances are mandatory: Veterans' Day Concert, Fall and Winter Concerts, Pre-District Music Contest, District Music Contest, and the Honors Concerts. There are other Honor Choir opportunities throughout the school year outside of Wilber-Clatonia. There are also other choral groups available outside of class time, ask the teacher for details.

GUITAR I

Length/Offered:	Year	PS:
Level:	9 th , 10 th , 11 th , 12 th Grades	NDE:

Guitar I meets daily and is designed to provide a musical introduction to playing the acoustic guitar. <u>No previous musical knowledge or experience is required!</u> Through in-class instruction, individual practice, and performances, the students will advance in their understanding of music and guitar pedagogy. Students will learn the history of the guitar, correct posture and playing technique, and how to read tablature, chord symbols, and standard notation. Students will play many different styles of music including folk, classical, rock, pop, and country. Participation in one concert per semester is required. Learning to play the guitar can be a healthy outlet for students to express their emotions during their time at school and throughout their lives and can be an enriching and rewarding experience for all students.

GUITAR II		
Length/Offered:	Year	PS:
Level:	9 th , 10 th , 11 th , 12 th Grades	NDE:

Guitar II meets daily and is designed to introduce students to advanced guitar techniques, work on ensemble playing, and improve proficiency in skills learned in the guitar I class. Students must complete guitar I to enroll in guitar II and may take the class for multiple years. Students will learn and perform a variety of music from various genres, cultures and time periods. This ensemble will perform at two concerts a semester. Playing the guitar can be a healthy outlet for students to express themselves and working as an ensemble is a skill that can be transferred into their future careers. It is also a lot of fun!

HEALTH & PHYSICAL EDUCATION

PE 9 HEALTH AND WELLNESS

Length/Offered: Year Level: 9th Grade

- GRADUATION REQUIREMENT -

This course is designed to promote behaviors of healthy lifestyle choices and improved quality of life. It is aligned to the Nebraska Health Standards. The units of study are: physical, mental and social health, drugs/alcohol, body systems, nutrition and fitness, sexual health and self-care will be learned throughout the year. They will be assessed on knowledge through tests, quizzes, projects, and in class discussions.

Students will demonstrate the ability to perform basic and advanced skills and tactics to participate in activities. Students will learn the basic fundamentals of weight training techniques to obtain optimal physical fitness. This course will be split with 3 days of physical activity and 2 days of health each week. Monday, Wednesday, Friday will be PE days; Tuesday and Thursday will be Health days. Students will be assessed on personal fitness 3-4 times a year.

BASIC STRENGTH TRAINING & CONDITIONING (BST&C)

Length/Offered:	Year	PS:	081341
Level:	10 th Grade	NDE:	080601 STR TRNG
Prerequisite:	PE 9 Health and Wellness		

This course is designed for students with some experience in the weight room who would like to benefit from it. It is a beginning weight training class. Students will improve upper and lower body strength through proper lifting and spotting fundamentals. Students will be in the weight room working on resistance training and speed related exercises on Monday, Tuesday, and Thursday each week. They will learn many health and exercise related topics through a health class on Wednesdays and Fridays will be a "Recovery Day"/Game Day. They will complete a variety of workouts that include a focus on a tiered system of lower body (T1), upper body (T2) and total body (T3). Our core lifts will be 1. Back Squat, 2, Bench Press, 3. Hang Clean, 4. Deadlift; we will test on these at the end of each semester. Students will learn to make connections between anatomy and weight training. Students will perform activities to aid in speed, agility, and endurance as well as assess self and others on technique. They will be assessed on personal fitness and weight training 2 times a year as we will track data everyday throughout the school year.

STRENGTH TRAINING & CONDITIONING I (ST&CI)

Length/Offered:	Year
Level:	11 th , 12 th Grades
Prerequisite:	Basic Strength Training & Conditioning &
	passed class with grade of A or B

PS: 081342 NDE: 089930 PHYSED OTH

This course is designed for students who want to advance their knowledge and skills in the weight room; especially those who are out for a sport. Students will apply prior knowledge of weight training techniques and procedures learned in Basic Strength Training and Conditioning. Students will continue to improve their upper and lower body strengths. Students will improve upper and lower body strength through proper lifting and spotting fundamentals. Students will be in the weight room working on resistance training and speed related exercises on Monday, Tuesday, and Thursday each week. They will learn many health and exercise related topics through a health class on Wednesdays and Fridays will be a "Recovery Day"/Game Day. They will complete a variety of workouts that include a focus on a tiered system of lower body (T1), upper body (T2) and total body (T3). Our core lifts will be 1. Back Squat, 2, Bench Press, 3. Hang Clean, 4. Deadlift; we will test on these at the end of each semester. Students will deepen the connections between anatomy and weight training and further their knowledge of the units studied from Basic Strength and Conditioning. They will use speed and agility to enhance fitness as well as assess self and others on technique and skill. They will be assessed on personal fitness and weight training 2 times a year as we will track data everyday throughout the school year.

PS: 081345 NDE: 080300 PHYS ED II

STRENGTH TRAINING & CONDITIONING II (ST&CII)

Length/Offered: Year

Level: 11th, 12th Grades

PS: 081343 NDE: 089931 PHYSED OTH

Prerequisite: BST&C and ST&CI & passed class with grade of A or B

This course is designed for students who want to continue to advance their knowledge and skills in the weight room; especially those who are out for a sport or would like to continue on in this field after high school. Students will be able to show the benefits of this class through prior knowledge gained from Strength Training and Conditioning I. Students will enhance improvement on upper and lower body strengths as well as increase the knowledge of speed and agility fitness to improve overall fitness. Students will be in the weight room working on resistance training and speed related exercises on Monday, Tuesday, and Thursday each week. They will learn many health and exercise related topics through a health class on Wednesdays and Fridays will be a "Recovery Day"/Game Day. They will complete a variety of workouts that include a focus on a tiered system of lower body (T1), upper body (T2) and total body (T3). Our core lifts will be 1. Back Squat, 2, Bench Press, 3. Hang Clean, 4. Deadlift; we will test on these at the end of each semester. Students will deepen the connections between anatomy and weight training and further their knowledge of the units studied from Basic Strength and Conditioning. They will use speed and agility to enhance fitness as well as assess self and others on technique and skill. They will be assessed on personal fitness and weight training 2 times a year as we will track data everyday throughout the school year. This class is for the experienced weight lifter.

LIFETIME SPORTS Length/Offered: Year PS: 081344 Level: 12th Grade Prerequisite: ST&CI – passed class with grade of A or B Career

This course is designed for students of the less competitive crowd. Lifetime Sports will use basic terms and learn the rules of team activities. Students will be taught to practice safety procedures and use good sportsmanship. Students will develop lifetime skills and practice personal fitness to live an active healthy lifestyle. Students will demonstrate knowledge in aerobic activities. Students will be assessed through quizzes and fitness tests. This course will do activity through sports 4 times a week and 1 day of weight training or agility stations.

SCIENCE

SCIENCE 9 - PHYSICAL SCIENCE

Length/Offered: Year Level: 9th Grade

- GRADUATION REQUIREMENT -

Science 9 is a required course for graduation that expands on the topics learned in middle school science and focuses on physical and Earth science. The class will include laboratory and group activities. The units covered include the nature of science, motion and forces, energy, electricity and magnatism, waves, matter, atoms, and reactions.

BIOLOGY

Length/Offered: Year 10th Grade Level:

- GRADUATION REQUIREMENT -

Biology is a required course for graduation that expands on the topics learned in middle school science. Biology focuses on the life sciences. The class will include inquiry based and lecture based learning activities. The units covered include; what is science, biochemistry, cells and cell processes, genetics, biological evolution, and ecology.

BIOLOGY ADVANCED STUDIES					
Length/Offered:	Year	PS:	130202		
Level:	11 th (with teacher approval), 12 th Grades	NDE:	130202 BIOLOGY ADV		
Prerequisite:	Science 9 and Biology				

Biology II expands the topics in Biology and explores other areas of life science. This course is intended for students planning post-secondary education, but may be useful for those looking at biological sciences, health sciences and agriculture as a career. The topics covered include biochemistry, cells and cell processes, genetics, ecology, the diversity of life, bacteria, protist, fungi, plants, and animals. The topics will be covered using inquiry based learning. Recommended at least a B or teacher approval in Biology and the ability to work both independently and in a group setting.

PRACTICAL SCIENCE

Length/Offered	: Year	PS:	132089
Level:	11th, 12th grade	NDE:	139930 SCI OTHER
Practical Science	e explores the areas of physical, earth, and life science	. The class will incl	ude inquiry based, lecture
based, and grou	ip based activities. This course is intended for any stud	dent. The topics co	overed are matter, forces and
motion, energy,	ecology, and environmental science issues.		

CHEMISTRY

Length/Offered:	Year	PS:	130301
Level:	11 th , 12 th Grades	NDE:	130301 CHEN
Prerequisite:	Science 9, Biology, Algebra I, & Geometry		
	(Algebra II Recommended)		

Chemistry is a college preparatory course intended for students planning for a four year college degree or a technical degree in the science or health fields. The class will prepare you for the first semester and part of the second semester of general chemistry in college. Topics covered include: matter, structure of the atom, the periodic table, chemical bonding, chemical reactions, stoichiometry, gas laws, VSEPR theory and acid base chemistry. The class is taught in a lecture format, with homework and labs.

PS: 130400 NDE: **130300 PHYSIC SCI**

130201

130201 BIOLOGY I

PS:

NDE:

I M

PHYSICS

Length/Offered:	Year
Level:	11 th (with teacher approval), 12 th Grades
Prerequisite:	Successful Completion (B or better) in Science 9 and
	Biology, Algebra I and II, Geometry, and Trigonometry

PS: 130303 NDE: 130303 PHYSICS I

Physics is a college preparatory class that deals with matter and energy, and their transformations. Topics to be covered include: scientific handling of measurements, vectors, motion and forces, momentum, gravity, electricity, heat, sound and light. Laboratory work is used to reinforce the fundamental properties discussed in lecture. Problem solving skills are taught and an emphasis is placed on the application of learned material. Inquiry based learning is also a focus. This class requires very good math skills.

ANATOMY AND PHYSIOLOGY

Length/Offered:	Year	PS:	130210
Level:	11 th , 12 th Grades	NDE:	130210 ANAT/PHYS
Prerequisite:	Science 9 and Biology		

Anatomy and Physiology concentrates on the structure and function of the human body. This course is intended for students planning for a four year college degree or a technical degree in the science or health fields. Dissection of fetal pigs is part of this course to enhance human anatomy. The major organ systems will be covered in units that include levels of organization, support and movement, the human life cycle, absorption and excretion, transport, and integration and coordination. Recommended at least a B or teacher approval in Biology along with good study and memorization skills.

SOCIAL STUDIES

CIVICS

Length/Offered: Semester (Fall Semester)

9th Grade Level:

This course is the study of government systems with the primary focus on democracy at the national, state, and local levels. We will look at different Executive, Legislative, and Judicial branch functions. We will also look at the duties and responsibilities of citizens as well as how constitutional principles apply to current issues.

ECONOMICS

Length/Offered:	Semester (Spring Semester)	PS:	150821		
Level:	9 th Grade	NDE:	150820 AMER HIST		
This course is designed to help students make decisions and understand economic principles as applied to current events					
and issues. Emphasis is placed on the allocation of resources, economic systems, economic institutions and incentives,					
markets and prices, market structures, productivity, the role of government, and economic indicators. We will also cover					

AMERICAN HISTORY II

the basics of personal finance.

Length/Offered: Year 10th Grade Level:

This course is the second half of American History beginning with the Civil War and concluding with current issues. Special emphasis is given to making connections between past and current events and analyzing the forces of change. Major topics of discussion include the Civil War, homesteading, immigration, World War II, and the social changes of the 1960s.

AMERICAN GOVERNMENT

Length/Offered:	Year	PS:	151110
Level:	12 th Grade	NDE:	151110 AMER GVNMT

- GRADUATION REQUIREMENT -

This course includes topics to give students an understanding of the American political system. Special emphasis is placed on the role of a citizen, the history of democracy, the role of the three branches of government, the local judicial system, local and state governments, and a comparison of global governments and economics.

WORLD HISTORY

Length/Offered:	Year	PS:	150800		
Level:	10 th , 11 th , 12 th Grades	NDE:	150800 WORLD HIST		
This course takes	a different approach than most World History classes in that it	is based	off of something called "Big"		
History. Where did everything come from? How did we get to where we are now? Where do humans fit in? Where are					
things heading? T	hese are questions that origin stories of different cultures have	address	ed for thousands of years. Big		
History attempts	to answer them by examining the entire past of the Universe us	sing the	best available ideas from		
disciplines such as	s astronomy, chemistry, biology, and history. Throughout the co	ourse, yo	u'll explore different scales of		

time and space and view human history from new angles. You'll develop historical research skills, identify and evaluate the effects of past, current, and potential future events and students will analyze how major past and current world events are chronologically connected.

HUMANITIES

Length/Offered:	Year
Level:	11 th , 12 th Grades

PS: 150821

NDE: **150820 AMER HIST**

NDE: **150820 AMER HIST**

150822

PS:

This course is designed to look at the art of being human. The course begins with a look at American culture and ethnicity in our country. It then looks at the various components of human culture including; art, literature, music, dance, drama, architecture, and sports. The year concludes with student presentations on their favorite humanistic activity.

SOCIOLOGY

Length/Offered: Semester

Level:

10th, 11th, 12th Grade

This course is the study of human interaction. This is a one-semester class that is opposite Current Issues. Sociology focuses on the study of communication among people and their environment, groups, family structure, relationships, crime, aging, and politics. We will also look at multicultural and gender issues and how different groups coexist in the United States. We will use many past and present national and world situations to study and understand where we all fit in the world and how the United States is the world's most diverse country.

CURRENT ISSUES

Length/Offered: Semester

Level: 10th, 11th, 12th Grade

Current Issues is the study of the United States and how it fits into a global society. Students will study different factors that make the United States what it is today. We will look at our modern world through politics, healthcare, economics, military, education, family, religion, and many other lenses. We will also discuss career planning and a future beyond high school for the students. Current news and events will be utilized in the class from the local, state, national, and international levels. Public speaking skills and performances will also be included in the course.

PS: 151300 NDE: 151300 SOCIOLOGY

PS: 151314 NDE: 151103 MOD PROBS

SENIOR DUAL CREDIT AND COLLEGE CREDIT COURSES

All college credit and dual credit classes will need to have the approval of the school administration and parents prior to enrollment with their associated college offering credit. Prior to consideration of any college classes, it is advised that the student and parent check with colleges which they might be considering. This will assure that the college credit will transfer and be useful in the college program in which the student may be interested.

Dual Credit Options

The following courses are offered at Wilber-Clatonia as Dual Credit options, but may be taken for high school credit only, if preferred. To be taken for dual credit, the student must register with the appropriate school and pay tuition for the course prior to the beginning of class. Registration for classes earning dual credit will be completed in either the spring of the year prior to the first semester offerings or in the late fall of the year prior to the second semester offerings. Tuition is billed by SCC, Peru State College, or Nebraska Wesleyan at the current rate and is the responsibility of the student. Please see Mrs. Shea-Carpenter for the most current rate information.

CHEMISTRY II DC

Length/Offered:	Year	PS:	130302
Level:	12 th Grade	NDE:	130302 CHEM II
Prerequisite:	Chemistry and Algebra II		
College Equivalent:	Peru State College: CHEM 101, General Chemistry I		5 Credits

Chemistry II is a two-semester laboratory course designed for the student interested in a career in science, a science related field, or a health careers related field. This course expands on the concepts learned in Chemistry. Additional aspects of chemical reactions including limiting reactants, percent yield, equilibrium, reaction rates, and thermochemistry are considered. Math skills will be frequently used to solve chemical problems. This course will go into much more detail than chemistry and give the students an understanding of the major fields of inorganic chemistry.

This class may be taken for Spring Semester Dual Credit through Peru State College for seniors who have successfully completed Chemistry and Algebra II.

SPANISH III

College Equivalent: Eval

Length/Offered:	Year	PS:	060243
Level:	11 th , 12 th Grades	NDE:	060243 SPANISH III
Prerequisite:	Spanish II		

(4 Wesleyan or UNL Credits per semester)

iBienvenidos a la clase de español! This is a high-intermediate course of the study of Spanish and Spanish-speaking cultures. It allows students to communicate fluently in Spanish and to become familiar with more elements of Spanish-speaking cultures. The emphasis of this course is placed on the development of the four main modes of language: listening, speaking, reading and writing. The context is intended to focus on students' lives and experiences, and gives them exposure to various Spanish-speaking countries, customs, and lifestyles. Although the main focus is on basic, meaningful communication; grammar is integrated throughout the course. Students will also acquire insight as to how languages and cultures work together through comparing Spanish to their own culture(s). By the end of this course, students will be able to effectively and comfortably communicate high-intermediate sentence structures using a variety of tenses, and fluidly express content in more than one way.

This class may be taken for Dual Credit through Nebraska Wesleyan. For more information see the Dual Enrollment section at the back of the book. Additional projects and academic requirements apply.

SPANISH IV

Length/Offered: Year Level: 11th, 12th Grades PS: 060244 NDE: 060244 SPANISH IV This is an advanced study of Spanish and Spanish-speaking cultures. Students will be able to advance to this level with instructor and/or administrators approval, along with having passed Spanish III with an A or a B. This course will help students to communicate fluently in Spanish and to become familiar with more elements of Spanish-speaking cultures. The emphasis of this course is placed on the development of the four main modes of language: listening, speaking, reading, and writing. Through novel study, projects, listening to music and film studies, students will acquire more advanced vocabulary and communication skills in Spanish. The context is intended to focus on students' lives and experiences and gives them exposure to various Spanish-speaking countries' customs and lifestyles. Although the main focus is on basic, meaningful communication, grammar is integrated throughout the course. Students will also acquire insight as to how languages and culture work together through comparing Spanish to their own cultures(s). By the end of this course, students will be able to effectively and comfortably communicate advanced sentence structures using a variety of tenses and fluidly express content in more than one way.

This class may be taken for Dual Credit through Nebraska Wesleyan. For more information see the Dual Enrollment section at the back of the book. Additional projects and academic requirements apply.

PSYCHOLOGY DC - THROUGH CONCORDIA UNIVERSITY

Length/Offered:	Fall Semester	PS:	151256_DLCC	
Level:	12 th Grade	NDE:		
College Equivalent:	Concordia Psychology 1810, Intro to Psychology		3 Credits	
This class is a compre	ehensive study of the principles of human behavior and r	nental proc	esses. It is an introdu	uct

tion to the science of psychology including the study of learning theory, memory, personality, growth and development, neurological aspects, abnormal behavior therapies, intelligence, motivation, emotion, sensation, perception and theoretical perspectives.

SOCIOLOGY DC - THROUGH CONCORDIA UNIVERSITY

Length/Offered:	Spring Semester	PS:	336
Level:	12 th Grade	NDE:	
College Equivalent:	Concordia: Sociology 1010 – Intro to Sociology		3 Credits
Introduction to the basic principles of sociology including the study of culture, socialization, social structure, social			
institutions, investigative behavior, deviance, inequalities and theoretical perspectives.			

HUMAN DEVELOPMENT ACROSS THE LIFESPAN - DC - THROUGH CONCORDIA UNIVERSITY

Length/Offered:	Spring Semester	PS:	336
Level:	12 th Grade	NDE:	
College Equivalent:	Concordia		3 Credits
Introduction to the basic principles of sociology including the study of culture, socialization, social structure, social			

institutions, investigative behavior, deviance, inequalities and theoretical perspectives.

INTRO TO PROFESSIONAL TEACHER EDUCATION - DC - THROUGH CONCORDIA UNIVERSITY			
Length/Offered:	Spring Semester	PS:	336
Level:	12 th Grade	NDE:	
College Equivalent:	Concordia		3 Credits

College Equivalent: Concordia

Introduction to the basic principles of sociology including the study of culture, socialization, social structure, social institutions, investigative behavior, deviance, inequalities and theoretical perspectives.

College Credit Options

Public Speaking is offered in our building by an SCC Instructor The sending site is Southeast Community College and the instructor is an SCC faculty member. They are college credit only options. All college credit classes that are not taught by a Wilber-Clatonia instructor will not affect a student's class rank or GPA. Registration with SCC and a textbook is required and are at the student's expense. No minimum ACT is required at this time.

PUBLIC SPEAKING DLCC

Length/Offered: **Fall Semester** 12th Grade Level:

400 NDE:

3 Credits

PS:

College Equivalent: SCC Course: Speech 1110, Public Speaking

Provides both theoretical basis and practical instruction for speaking effectively in public. Emphasis on training in basic speech skills, development of voice, topic selection, audience analysis, speech preparation and organization, researching, strategic and creative language use, effective listening and delivery skills, and common types of public speeches, acknowledging the influence of various cultural and ethnic backgrounds.

SOCIOLOGY DC - THROUGH CONCORDIA UNIVERSITY

Length/Offered:	Spring Semester	PS:	336
Level:	12 th Grade	NDE:	
College Equivalent:	Concordia: Sociology 1010 – Intro to Sociology		3 Credits

Introduction to the basic principles of sociology including the study of culture, socialization, social structure, social institutions, investigative behavior, deviance, inequalities and theoretical perspectives.

SENIOR ONLINE LEARNING/ OTHER ONLINE COLLEGE CREDIT OPTIONS

Other on-line classes may be available for college credit. These classes may be worked into the senior student's schedule as time permits. See Mr. Finley for more information on current offerings.

Weighted Grades

Weighted credit will be given for the following classes based on the rigor demanded in their completion:

	The	The grading scale used is as follows:		
English 12 CP	А	=	5 points	93 - 100%
Calculus	В	=	4 points	86 - 92%
Physics	С	=	3 points	78 - 85%
	D+	=	1.5 points	75 - 77%
	D	=	1 points	70 - 74%
	F	=	0 points	0 - 69%

ELL & VOCATIONAL TRAINING

ELL Program Model/Description

The Department of Education will provide programs of English language for students that are English Language Learners (ELL) as required by law by the Nebraska Department of Education Title III Accountability Office. ELL students are those students whose native language is other than English and who have such difficulty speaking, reading, writing, or understanding the English language, as measured by an English language proficiency test. These impediments contribute to the individual's inabilities to meet state performance levels, to achieve in English instructed classrooms, and to fully participate in society.

Wilber-Clatonia Public Schools has implemented a program model which is a systematic, research-based approach that enables students to meet academic standards using the English Language. Instruction for ELL students will be provided using the following strategies or a combination of them:

PULL-OUT STRATEGY

ELL students leave the classroom part of the day to receive ELL instruction, often focused on grammar, vocabulary, and communication skills.

PUSH-IN STRATEGY

Students are served in a mainstream classroom and the ELL teacher or a para-professional will provide clarification and use ELL strategies to further their acquisition of the English language within the curriculum content.

When necessary, Wilber-Clatonia will employ a different strategy for new comers:

Newcomer/Sheltered Instruction

Students will leave the classroom for a good portion of the day to receive ELL instruction, acquiring beginning English-language skills in addition to core academic skills. Their native language may be utilized, if available.

Vocational Training

This course is for those special education students that have been identified as a student that will need some assistance in their transition to the world of work. The objective is to place students in an environment where they can build confidence and learn soft work and job keeping skills. **SKILLS:** *Teamwork* (being cooperative and showing leadership when necessary), *Communication* (articulate oneself well, being a good listener, and using appropriate body language), *Time Management* (showing up on time and fulfilling expected tasks), *Flexibility* (adapting to change), *Patience* (accepting criticism and applying lessons learned) and *Motivation* (taking pride in a job well done).
